Microsoft Settlement -- Please sign off on it.

We've wasted enough time and tax payer earned monies on Microsoft.
They are a good company, doing good things for users around the world.
Software has never been so cheap (Look at Sun's and Oracle's prices for
product -- no wonder they are complaining).
It's become quite transparent that this is about competitors who can't win
fair and square.

It is not time to end this dispute.

Regards,
Dan Plastina
